## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-10, 35 and 36 are drawn to estimating results by collecting workload information from a database, classified in class 707, subclass 3.
  - II. Claims 11-16 and 37 are drawn to estimating results by computing an aggregate over values in sampled tuples, classified in class 707, subclass 4.
  - III. Claims 17-34 and 34-41 are drawn to generating an outlier index based on sub-relations, classified in class 707, subclass 102.
2. Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable.

In the instant case invention I (collecting workload) has separate utility such as collecting data in engineering applications. Invention II (computing sampled tuples) has separate utility such as estimating data for statistical applications. Finally, invention III (generating outlier index) has separate utility such as with any other generating database systems.
3. Because these inventions are distinct and search Groups I, II and III are not required to be simultaneous, restriction for examination purposes as indicated is proper.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
